

# Oxafert Plus

Lawn Solutions Oxafert Plus Herbicide, Insecticide and Fertiliser is a convenient ready to use formulation for the preventative control of certain annual grass weeds and insect pests in turf with the added benefit of a fertiliser treatment.

For all warm season turfgrass areas, including fairways, golf tees, municipal sports fields and lawns, except cool season grasses (ryegrass/fescue), Santa Ana couch or newly seeded areas.

## Prevents the following weed seedlings during germination:

Summergrass, Crowsfoot, Wintergrass and Creeping Oxalis

## Treats the following common lawn pests:

African black beetle, Argentinian scarab and Billbug

## Sizes

20kg bag

## Approximate area of coverage

660m<sup>2</sup>

## Application

Post-emergent herbicide should be applied to area to kill established weeds and turf should be free of weeds prior application.

Apply product evenly to dry foliage and bare areas using a granular fertiliser spreader to give an even coverage. Applications must be made before weeds have begun to germinate.

Irrigate with 10mm of water after application.

If longer pre-emergent control is required a repeat application should be made 7-10 weeks after initial application.

## Rates

- Pre-emergent control of Summer Grass and Crowsfoot - 3KG/100M<sup>2</sup>
- Pre-emergent control of Winter Grass and Creeping Oxalis - 4KG/100M<sup>2</sup>
- African Black Beetle Larvae, Argentinian Scarab Larvae and Billbug Larvae - 3KG/100M<sup>2</sup>

## N:P:K

15:1.31:16.6 + 10% S, 0.06% Fe & 1.8% Mg

## Precautions

Not to be used for any purpose, or in any manner, contrary to this label unless authorised under appropriate legislation.

## Product Details

- Will not inhibit turf root regrowth or recovery from damage.
- Will not harm healthy turf.
- Controls weeds by controlling weed seedlings as they come in contact with the herbicide during germination.
- Will not prevent roots from tacking down.
