

Lawn Launcher

For all lawns and most trees, shrubs and flowering plants, Lawn Launcher is a mix of fertiliser and Premium Water Crystals to give a new lawn a superior start. Launcher supplies essential nutrients for strong plant and root establishment. Plus, the moisture magnet water crystals reduce the risks involved in lawn establishment or plants dying off during water restrictions or extreme heat.

Sizes

900g bucket
3kg bucket

Approximate area of coverage

900g up to 30m²
3kg up to 100m²

How it Works

Launcher is a mix of high quality starter fertiliser and Moisture Magnets Premium Water Crystals, which are small free flowing white granules that resemble sugar crystals when dry. On the introduction of water they swell dramatically to become super absorbent sponges. When placed in the root zone of plants they capture and store several hundred times their own weight in water and soluble compounds such as fertiliser.

95% of absorbed water and nutrient is available back to the plant on demand through their roots, which grow directly into the water swollen crystals. Moisture Magnets store water exactly where the lawn and garden needs it every time it rains, significantly reducing the need for hand watering of your lawn and garden.

N:P:K

15:0.7:4 + 19% S, 1.5% Ca, 2% Fe & 5% volume of water crystal.

Product Details

- Lightly rake into turf underlay to a depth of approximately 30mm before installing turf.
- Water thoroughly once used for planting in both potting mix and soil.
- Do not apply to top surface of lawns.

	APPLICATION RATES
LAWNS	30g/m ² 1 x 900g bucket/30m ²
POTS, TUBS & CONTAINERS	10g/litre of potting mix
TREES, SHRUBS & GARDEN BEDS	10g/litre of soil from hole mixed and put back in.

WATER THOROUGHLY.
